

# WPA2 challenge #3

Attached, you will find:

1. A pcap file containing the 4-way handshake packets and the additional beacon packet. We now know that the password is from RockYou!
2. A file containing 5000 passwords from the RockYou list (as iterating over the entire RockYou list will take too long in this case).

Your goal is to perform a dictionary attack in order to discover the password.

You can use your code from WPA2 challenge #2!

The flag will be the password.  
Good luck!
